

Viacheslav Stupak

Senior UI/UX Expert

Experience & areas of impact

Sep 2025 – now

Senior UI/UX Engineer — Leobit, Lviv

Responsible for full design arc — from discovery phase, research and interviews to developer-ready handoffs and design quality assurance.

- Crafting custom B2B and SaaS platforms from scratch and maintaining large legacy platforms.
- Creating sophisticated design systems creation and support
- Mentoring, consulting and design supervision.
- Establishing the evaluation system for the design specialists.
- Conducting technical interviews and taking part in the internal and external development of the design unit.

Aug 2022 – July 2025

UI/UX Team Lead — Trinetix, Kyiv

Managed end-to-end design work on enterprise projects for a Big Four client.

- Ran discovery sessions: stakeholder interviews, competitor analysis, and UX research; defined user flows and user stories; analyzed requirements and aligned them with business goals and user needs.
- Managed and executed design delivery: wireframes, prototypes, usability testing, accessibility reviews, and developer-ready handoff
- Ensured continuous alignment with PMs, BAs, and engineers throughout the design and development lifecycle
- Conducted performance reviews and mentoring; created personal development plans for team members
- Built internal standards: accessibility audit guide, design documentation templates, and skill matrix
- Contributed to workshops and knowledge-sharing initiatives

April 2019 – July 2022

Senior UX/UI Designer / Resource Manager — Andersen, Kyiv
